

## ANALYSIS ABOUT EQUALITY AND EMPLOYMENT IN THE EUROPEAN UNION: A SPECIAL REFERENCE ABOUT UNIVERSITY GRADUATES

Nieves Gómez Aguilar - Carmen Ferradans Caramés (Coords.)

At the end of 2009, the Government of Andalusia presented the Euroemployment Programme with the intention of promoting the investigation and implementation of good practices in the employment field through interchange with other employment services in Europe. The University of Cádiz, and specifically the Employment Area, decided to apply for this programme with the intention of improving the services that it provided the students. The objective of this project was to promote equality of opportunities to access employment from a perspective of gender, disability and ethnic minorities through the design and implementation of good practices in labour orientation and intermediation. The first stage of this project (October 2010 to March 2011) was to develop a comparative study which analyzed the real situation of university graduates' access to employment. In order to achieve this objective we looked for others universities which have employment services to ease the interchange of studies and practices. The selected universities were the University of Pisa (Italy) and the University of Bangor (UK).

This book is the collection of these studies which shows the possibility of knowing the situation of graduate employment in the three areas of the project (Pisa, Bangor and Cádiz).
